

Nove

Lookbook

## About Nove

*Nove creates the modern women's wardrobe that is wearable in every stage of life. Even during and beyond pregnancy. Intertwining effortless elegance and contemporary refinement, Nove understands the women of today. Our body changes up to 30 times during life, therefore we need a wardrobe adapting to our bodies - not the other way around.*

*Women should be able to focus on what they want achieve in life, being supported by a wardrobe evolving with their needs. Be it business, babies or both. We follow our own mission and we need a uniform that is supporting us, every single day, so we can focus on the important things that move us.*

## Sustainability, Durability, Longevity

*We believe in sustainable garments that are made to last. A lot of research and time goes into our material sourcing. Choosing mainly natural and organic materials, which are produced sustainably, is key. We avoid waste by using Loden Wool that can be cut from both sides. The silk worms that produce our beautiful organic Peace Silk are allowed to hatch before the material is used.*

*All garments are manufactured in the European Union and we know all of our suppliers. We already do as good as we can, but we won't stop to strive for even getting better in caring for the environment.*

*Nove wants to set a counterpart to garments that can be worn only for a short period of time, such as Maternity Wear, inviting to wear and love favorite pieces throughout all stages of life forever.*

*Kasan Trousers Organic Cotton*
